

Culminating Project: My Digital Citizenship Pledge

Name: _____ Date: _____

LEARNING OBJECTIVE

Student will be able to synthesize the quarter's digital citizenship lessons into a personal action plan and a PSA poster to share with others.

MATERIALS NEEDED

- Poster board or large paper
- markers or colored pencils
- ruler
- pencil
- paper (for the personal pledge)

HANDS-ON ACTIVITY

1. Review your work from all 8 previous weeks (digital footprint, passwords, privacy, misinformation, cyberbullying, screen time, scams, etiquette) and choose the 4 lessons that felt most important to you.
2. Design a 'Digital Citizenship PSA' (public service announcement) poster with a catchy title, aimed at teaching younger kids or peers about safe and responsible internet use, featuring your 4 chosen lessons as sections with a short tip and simple illustration for each.
3. Write a personal 'Digital Citizenship Pledge' (5-7 sentences) listing specific, realistic commitments you will make regarding passwords, privacy, screen time, and how you treat others online.
4. Sign and date your pledge, and if comfortable, ask a parent/guardian to sign as a witness supporting your commitments.
5. Present your PSA poster to a family member as if teaching a workshop, and read your pledge out loud to them.

QUESTIONS

1. Which 4 lessons did you choose to feature on your PSA poster, and why did you pick those specifically?
-

2. Write one specific, realistic commitment from your Digital Citizenship Pledge.
-

3. Of everything you learned this quarter about digital citizenship, what is one thing you will actually do differently starting now?

4. Why is it valuable to create something (like this PSA poster) meant to teach OTHER people, rather than just learning the material for yourself?
