

The Life Cycle of a Plant

Grade: 3-5 | Subject: Science | Week 28: Plants: Seeds, Roots, and How Things Grow | Time: 35–45 minutes

Learning Objective

Student will independently describe the life cycle of a plant in order from seed to flower to seed again.

Materials Needed

Plant life-cycle picture cards (seed, sprout, seedling, mature plant, flower, new seeds), paper plate divided into sections

Practice Activity

Child narrates the full life cycle aloud using the plate as a visual guide. Extend by writing 2-3 sentences reflecting on the skill.
